Please, can anyone help me understand how to exclude a file from being downloaded in Apex? When I generate the file using the REST/SOAP api using the following call: Attachment attach = new Attachment(Name = 'TempFile', ContentType = 'application/pdf', Body=Blob.valueOf(attachmentBody)); insert attach; how do I control whether or not a user can download the file? Thanks in advance! A: There is no way to control whether a file will be downloaded. There can be a permission security issue with reading the file from a Blob field. What you should do is do a check to see if the user has permission to download files before you generate the Blob. Then, if they have permission and you want to make it visible, you could use the QueryOption.HideResultMarkup flag in your query's result set. Finally, I would add 09e8f5149f
