Developed by a new AI team under the FIFA title, HyperMotion Technology focuses on challenging and realistic gameplay. It provides intelligent and reactive AI through more advanced attributes to help players master the intricacies of football. FIFA 22 also adds improvements to player interaction and ball physics to ensure a more realistic and fluid gameplay experience. We have already received quite a lot of feedback about the real player movements. They're tracking really well, which is huge; a huge compliment to the team for all their hard work." Benoît Chesneau, Senior Designer, EA SPORTS FIFA The FIFA team's next goal is to make sure all these technical enhancements are seamlessly integrated into FIFA's gameplay, which led to the integration of 'HyperMotion' into the latest game. To better enable players to step into the boots of a Real Player, EA Sports has focused on improving virtual performance through the use of a new 'foot model'. Essentially, it's the detailed and accurate anatomy of a player's foot. This combination of player-specific physical traits allows EA Sports to simulate the game mechanics in the most realistic way possible. It makes FIFA more intuitive to play and more enjoyable to watch. "We developed a foot model, which is the most realistic and advanced foot model that I can remember since FIFA 2010," said Benoît Chesneau. "If I compare my feet to that, I can say that we are really close in terms of level of detail." Vigorously real With careful player-specific tuning and player-specific weighting, there's also a much wider range of muscular movements. Even the characteristics of a player's muscles must be optimised for the in-game engine to work in the most realistic way. "The impact of a tackle, the force of a tackle, the speed of a tackle, the impact of a tackle, the pressure, the speed of a tackle; a player specific weighting is required for all of these movements," said Benoît Chesneau. "We also use the player's attributes, the attributes that are related to the heart of the game: the strength, the speed, the endurance and the technical level." Stronger, faster and bigger The upcoming game includes a host of new abilities such as ball control and speed in addition

Q: What is the name of this indoor plant? This plant only grows indoors. I bought it in Hong Kong some years ago. I do not know its name. However, from what I know, it grows inside buildings (it has a red flower) but it also needs water and light. I would love to have it, as it is one of the most interesting plants in my apartment, but I have to name it to be able to buy it. A: I believe it's Zonaria sp. It is one of the most attractive indoor plants because of its pink flowers. Also, this answer has some more info: FDA Takes On Turnstiles and Restrictions The FDA
