**Follow @Pennyfortebulldogs User Rating: / 5 Please Rate Cross Set Infinity is a deckbuilding game of trading and deckbuilding. You are a spy, working in the system of an organization calling themselves the International Brotherhood of Liberty. During a raid on an enemy base, you manage to steal a power of planning (a deck) for the Brotherhood of Liberty. You will be tasked to build a deck of around 36 cards, aimed at either destroying your opponents, or saving the entire world. A Game of International Brotherhood of Liberty Resources are scarce, and everyone is wearing a tracking device and registered with their government. The Best Deck Wins Cross Set Infinity is a trading game, and so players must have a strong deck to survive. Players are given six turns to complete their turn, and the first player to have their second to last card placed into the central counter wins. All cards gain levels during the game, that eventually raise the maximum level a card can be to 60. Ideally if you can get a high-level threat card, you are the king, and if you can also get an easy card, you will be the most powerful. Setting Up the Deck Breaking down the deck into factions may not seem helpful, but there are some major factions that need to be built up as early as possible, while there may be some weaker cards in smaller factions. This allows you to set up the length of the game, how many plots you own, what your mission is etc. Constructors: Cards that allow you to build a location, worker cards, traps etc. Deploying: Cards that allow you to move to a location, or attack. Working in a campaign stage now. Mind you, this is just a rough guide. The actual decks may vary wildly, because I will be building the set piece of cards. Here's a little basic structure of the preview deck: A good amount of cards are available in the base set, so as of current, there are not restrictions on ordering upgrades for the base. Standard uses are: Defense (Scarcity): The mission card, being the one on the left, allows you to make a regular raid to steal whatever your the base currently has, and that**
