I don't know what address I used as this is the first time I have bought from them but it says its not registered. I had to convince them that I had not been accessing it at all as they had a "doom" message in front of me! It even said to get out a pistol and shoot it so there were lots of tears and frustration all round, they finally gave in and I received my parcel today. Even now its not great, It didnt arrive as promised so the issues seem to have been delayed and I will get my full refund and get that other thing today, there is no reason why I should pay this much for something that does not work! They also have not replied to my email for help. What a disgrace

Scythe: Invaders from Afar Like all Scythe modules, the content of **Invaders from Afar** is designed to be played at any player count. The core game plays fairly quickly and doesn't require the expansion box. Our goal with **Scythe: Invaders from Afar** is to introduce players to a fresh gaming experience while letting them enjoy Scythe in a different way, using the special seasonal rules for autumn and winter. In particular, in **Scythe: Invaders from Afar**, you can: - gain powers by collecting harvest, craft new materials, and protect your harvest; - battle your opponents during a long winter; - open farms and establish your own holdings; - travel to distant realms where you can meet new friends and foes. These changes are intended to augment the core game, not replace it. **Scythe: Invaders from Afar** doesn't bring a new faction into play, but instead provides alternate seasonal gameplay. In this expansion you are playing the enemy in a different setting and for the first time. By playing this module, you will encounter three board types: -- the winter board, -- the spring board, and -- the summer board. The winter and summer boards are the same sizes and with the same set of resources, but the winter board is permanently locked for your opponents while the spring

board is temporarily locked for your opponents. Seasonal gameplay
Seasonal games focus on the seasons. During the fall, winter, and spring, there will be fewer enemies nearby, and the cost of moving and deploying troops is greater. In the spring, you will find yourself fighting against fewer armies in the places where you would like to establish a foothold. Seasonal games are shorter because these seasons last longer than the seasons in Scythe. Apart from these changes to the board and resource costs, seasonal games are just like regular Scythe games. You will also gain powers by collecting harvest, craft new materials, and protect your harvest. Each season also adds a special power to your factions that can be either active at the beginning or during the course of the game. Summary of Seasonal Changes Winter Player Setup 1.5 Special seasonal rules are different from the core rules; -- each player starts with 1 harvest and 1 scrap metal card; -- harvest power may not be turned in until after the battle is over; -- harvest power may be spent during a winter. In the spring, harvest cards are added to the discard pile, and harvest power may
